I am an experienced programmer with approximately 8 years of experience working with various programming languages and technologies. My journey in programming began with C# while studying at university. Subsequently, I pursued a professional career in front-end development, specializing in JavaScript and related technologies, for almost 7 years. During this period, I worked across different industries and acquired valuable insights into front-end development. However, given my long-term career aspirations to become a system architect, I have recently transitioned to Java as it aligns better with my current goals. I do not foresee any other endpoint for this path.

Main skills: Java, Spring, Javascript, Typescript, ReactJS

EXPERIENCE

Java Developer

~6 months 11/2022 - now

implemented the following 2 projects from scratch with Spring Boot, and connected to the services using feign client:

[authentication-service](#)

[telepardaz-service](#)

Technologies: Spring (Boot, Data, Security-OAuth2.o, Cloud, Hibernate)

Kian Digital — Senior Front Developer (Tehran Iran)

2+ years 11/2020 - 12/2022

[Bourseon](#), [kiandigital](#), [kiandigital-blog](#), in the Bourseon project, I implemented a lot of features and ultimately turned it into a CMS that we could quickly use to implement almost all of the company's website.

Develop [Dabi](#) project, a sales and consulting platform.

I've started Bourseon-data project from scratch, and its job is to crawl data related to stocks.

Technologies: Javascript, NextJS, Sanic

Maktab Sharif — Frontend Trainer (Part time)

~1.5 years 9/2022 - 12/2020

Tosan Techno — Frontend Developer (Tehran Iran)

~1 year 10/2019 - 10/2020

[Seller.shopp.market](#), started from scratch with a backend developer at Shop company, any business can easily turn into an online store with it.

Technologies: Typescript, ReactJS

PersianGig — Frontend Developer (Tehran Iran)

1+ years 10/2018 - 7/2019

[Persiangig](#) is a platform for purchasing cloud infrastructure services.
I implemented its custom design system from scratch.

Technologies: Typescript, ReactJS, Redux

Freelance Frontend Developer

~3 years 2015 - 2018

[Pedu.sharif.edu](#)
[Tamirkarsalam](#)
[Derayatacademy](#)
[es724](#)

[Codinic](#)
[Vakil-android-application](#)
[Vakil-web-application](#)
[Tozino-android-application](#)

Technologies: Javascript, ReactJS, JQuery

EDUCATION

Golestan University , Golestan — BSc

9/2009 - 9/2013

Computer Science, Thesis: Implementation of face detection and recognition application with C#.

SKILLS

Programming Languages

Java, JavaScript, TypeScript

FrameWork & Technology

Spring (Boot, Data, Security-OAuth2.o, Cloud), Hibernate, Kafka, RabbitMQ
ReactJS, NextJS

DataBase

MySQL, MongoDB, Redis, H2

Servers

Tomcat, nginx

Test

Unit Testing (AssertJ, Mockito), Integration Testing (MockMVC)

Build Tools

Maven, npm

DevOps & CI/CD

Docker, docker-compose, Linux

Languages

Farsi: native, English: upper intermediate
