I am an experienced programmer with approximately 8 years of working experience with various programming languages and technologies. My journey in programming began with C# while studying in university. Subsequently, I pursued a professional career in front-end development, specialized in JavaScript and related technologies, for about 7 years. Meanwhile, I have also worked among different businesses and acquired valuable insights in front-end development. However, I would like to become a system constructor, I have recently transitioned to Java as it aligns better with my current goals.

Main skills: **Java, Spring, Javascript, Typescript, ReactJS**

EXPERIENCE

Java Developer   *~6 months*   11/2022 - now

implemented the following 2 projects from scratch with Spring Boot, and connected to the services using feign client:

authentication-service

telepardaz-service

Technologies: *Spring (Boot, Data, Security-OAuth2.0, Cloud, Hibernate)*

Kian Digital — Senior *Front Developer (Tehran Iran)*   *2+ years*   11/2020 - 12/2022

Bourseon, *kiandigital*, *kiandigital-blog*, *in the Bourseon project, I implemented a lot of features and ultimately turned it into a CMS that we could quickly use to implement almost all of the company's website.*
Develop Dabi project, a sales and consulting platform.
I've started Bourseon-data project from scratch, and its job is to crawl data related to stocks.

Technologies: Javascript, NextJS, Sanic

Maktab Sharif — *Frontend Trainer (Part time)*   *~1.5 years*   9/2022 - 12/2020

Tosan Techno — *Frontend Developer (Tehran Iran)*   *~1 year*   10/2019 - 10/2020

Seller.shopp.market, started from scratch with a backend developer at Shop company, any business can easily turn into an online store with it.

Technologies: Typescript, ReactJS

PersianGig — *Frontend Developer (Tehran Iran)*   ***1+** years*   10/2018 - 7/2019

[Persiangig](#) is a platform for purchasing cloud infrastructure services.
I implemented its custom design system from scratch.

Technologies: **Typescript, ReactJS, Redux**

Freelance Frontend *Developer*   *~3 years*   2015 - 2018

[Pedu.sharif.edu](#)   [Codinic](#)
[Tamirkarsalam](#)   [Vakil-android-application](#)
[Derayatacademy](#)   [Vakil-web-application](#)
[es724](#)   [Tozino-android-application](#)

Technologies: Javascript, ReactJS, JQuery

EDUCATION

Golestan University , Golestan — *BSc*   9/2009 - 9/2013

Computer Science, Thesis: Implementation of face detection and recognition application with C#.

SKILLS

Programming Languages	*Java, JavaScript, TypeScript*
FrameWork & Technology	*Spring (Boot, Data, Security-OAuth2.0, Cloud), Hibernate, Kafka, RabbitMQ*
	ReactJS, NextJS
DataBase	*MySql, MongoDB, Redis, H2*
Servers	*Tomcat, nginx*
Test	*Unit Testing (AssertJ, Mockito), Integration Testing (MockMVC)*
Build Tools	*Maven, npm*
DevOps & CI/CD	*Docker, docker-compose, Linux*

Languages

Farsi: native, **English**: upper intermediate
