I am a **Frontend developer** with 7+ years of work experience. My passion for coding stems from the fact that it allows me to break out of the monotony of everyday life and pursue creative problem-solving.
My primary goal is to design system architecture for millions of users, and to achieve this, I am always eager to learn any new technologies, concepts, or programming languages necessary. Currently, I am transitioning to Java programming and striving to master microservices patterns.

Main skills: Javascript, Typescript, ReactJS

EXPERIENCE

Kian Digital — Senior *Front Developer (Tehran Iran)*   *2+ years* 11/2020 - 12/2022

Bourseon, kiandigital, kiandigital-blog, in the Bourseon project, I implemented a lot of features and ultimately turned it into a CMS that we could quickly use to implement almost all of the company's website.
Develop Dabi project, a sales and consulting platform.
I've started Bourseon-data project from scratch, and its job is to crawl data related to stocks.

Technologies: Javascript, NextJS, Sanic

Contact : Mahsa Jabbari (Manager) - +989367016280
